### **Give your body the nutrients that are critical to health**

Nutritional supplements are more important today than ever. Our bodies are forced to deal with greater environmental pollutants (impurities) and we're undernourished because over-farming has depleted the nutrients from our land and produce grown on the land.

### **It's important to select vitamin supplements:**

- **To replace the nutrients missing from food**
- **Made with the highest quality raw materials**
- **Nutrients that enhance absorption**
- **Nutrients that naturally cleanse impurities**

### **Nutritional Cleansing unlocks the miracle of the human body**

Nutritional Cleansing increases the health benefits you'll receive from the ancient health practice of cleansing. The herbs, vitamins and minerals that aid cleansing do two things:

- **Accelerate the removal of impurities from the body.**
- **Nourish the body with vital nutrients to rapidly revive health.**

A cleansed and revitalized body is stronger, resists illness better, is more efficient and performs at a higher level than one that is filled with impurities. Many people notice an ability to reach and maintain their ideal weight.
